CHINESE HERBAL MEDICINE AND CANCER

Chinese herbal medicines help to alleviate the side effects of conventional cancer treatment, while boosting immune system function and improving clinical results. Twenty years of clinical experience demonstrates that combined Western and Chinese herbal therapies provide superior results than either system used alone. Herbal prescriptions are custom made for the individual patient, and modified at each visit to optimize results and prevent the development of resistance.

Information about the benefits of acupuncture for mesothelioma cancer patients undergoing chemo and other palliative mesothelioma treatment methods – from www.Mesothelioma.com.
